

## **Board Policy 340: Governance Philosophy** Administration

In appropriate areas of college policy formulation, the Iowa Valley Community College District Board of Directors recognizes the need for broad representation and participation by the many populations served. The Board, administrators, faculty, and students have certain legal or delegated rights and responsibilities which should not be abrogated because of undue pressure or threat. It is the thoughtful mix of opinions, the differences in solutions offered, and the respect for the task of those with whom final authority rests that make a strong and viable institution.
